#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 16 November 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.

### DETAILED ACTION

1. Receipt is acknowledged of Applicant's Prior Art Statement, filed November 16, 2006.

2. Claims 7, 10-12, 16-17, 23-24, 27-29, 33-34, and 38-45 have been canceled.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-2, and 5-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gilbert. Gilbert discloses a tool honing guide and bevel setting jig for honing a tool comprising all of the subject matter set forth in Applicant's claims above. Note guide(22b) comprising tool holder(20b,41b) and roller(30a); and jig(60a) for removable coupling to the guide to set the tool at selective sharpening angles.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gilbert in view of McLean. McLean discloses a honing guide for sharpening cutting tools at selectively adjustable sharpening angles, having means in the form of an eccentrically mounted roller and spring biased height adjustment means located on the roller axle, to selectively adjust the height of the roller axle and hence the sharpening angle of the tool

holder. To provide such means for adjusting the angle of the tool holder in the device of Gilbert, to automatically present the tool holder at a predetermined angle for sharpening, and avoid errors inherent in manual adjustment to the proper angle, would have been obvious in view of McLean.

7. Claims 3, 8, 14, and 36-37 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Claims 4, 13, 15, 18-22, 25-26, 30-32, and 35 are allowed.

9. Applicant's arguments filed November 16, 2006 have been fully considered but they are not persuasive. Applicant's new limitation in independent claim 1, of the jig comprising releasable clamping structure for removable coupling to the guide clamp receiving structure, is deemed to be disclosed by Gilbert. With regard to claim 9, McLean is deemed to teach the use of an eccentrically mounted roller and spring biased height adjustment means located on the roller axle, to selectively adjust the height of the roller axle and hence the sharpening angle of the tool holder. To provide such means for adjusting the angle of the tool holder in the device of Gilbert, to automatically present the tool holder at a predetermined angle for sharpening, and avoid errors inherent in manual adjustment to the proper angle, would have been obvious in view of McLean.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (571) 272-4494. The examiner can normally be reached on Monday through Thursday, and on alternate Fridays, from 8:00 to 5:30.
